WORK EXPERIENCE

Ingsoftware / Neopix

Full-stack engineer

Apr 2023 – Present

Niš, Serbia

- Collaborated closely with designers, project managers, marketers, and frontend and backend engineers to deliver digital products from concept to launch.
- Participated in product discovery processes to define and understand client requirements and recommend the most suitable technology stack tailored for their use case.
- Built user interfaces in React, Vue, Astro and Nuxt frameworks.
- Developed REST APIs and data pools. Integrated multiple third party APIs in Node.js and PHP.

Vega IT

Full-stack engineer

Apr 2022 – Apr 2023

Niš, Serbia

- Developed a food ordering web application for a company with nearly 1,000 employees using Vue and Laravel frameworks. Achieved high code test coverage by writing comprehensive unit and feature tests.
- Built and maintained a serverless API using AWS Lambda functions.
- Improved the deployment process by introducing the AWS SAM (Serverless Application Model) framework.

Codeus

Full-stack developer

Jan 2021 – Apr 2022

Niš, Serbia

- Collaborated with an international team of engineers on a globally recognized booking platform.
- Worked closely with development, design, and business teams to create and develop an improved design system and integrate it across various existing applications and websites to improve user experience.
- Developed and performed A/B tests to monitor, optimize and improve conversion rates.
- Integrated multiple API based microservices.
- Wrote unit and end-to-end tests to ensure code quality and reliability.
- Developed a REST API for the mobile version of financial software used to manage large condominium blocks.

Atomia AB

Full-stack developer Internship

Jun 2020 – Jan 2021

Niš, Serbia

- Developed the back office of a financial web application for issuing and purchasing gift cards, serving a union of major city centers and shopping malls across Sweden, using the Laravel ecosystem, MySQL, HTML, and CSS.
